

AI TOOL USAGE DECLARATION

Project Title:

AUTOSAR HLD Document Analysis Assistant using Retrieval-Augmented Generation (RAG)

Student Name: Aditi Bachulkar

Programme: B.Tech Computer Engineering/ 2023-2027

PRN: 123B1B085

Institute: PCCOE

Academic Year: 2026–2027

Declaration

I declare that AI-assisted tools were used during the development and documentation of this project as supporting tools. They were used for project planning, technical guidance, coding assistance, debugging, troubleshooting, documentation preparation, and refinement of project content.

The AI-assisted tools were used to support the development of the Python code, RAG workflow, project documentation, synopsis, technical explanations, and demonstration material. The generated suggestions were reviewed, adapted, tested, and integrated according to the actual implementation of the project.

I take responsibility for the final project, its implementation, results, documentation, and presentation. I have reviewed the submitted work and understand the working of the implemented system and the results obtained from it.

Areas of AI-Assisted Usage

- Project planning and technical guidance
- Python coding assistance and debugging
- RAG workflow and implementation guidance
- Documentation and synopsis preparation
- Troubleshooting and error resolution
- Refinement of project explanations and presentation content

Student Declaration

I confirm that the use of AI-assisted tools was limited to supporting the development and documentation process. I am responsible for understanding, explaining, demonstrating, and presenting the submitted project.
